A.D. 1867, 8th OCTOBER. N° 2828.

Lotion for the Eyes.

(This Invention received Provisional Protection only.)

PROVISIONAL SPECIFICATION left by Angelo Ticcozzi at the Office of the Commissioners of Patents, with his Petition, on the 8th October 1867.

I, ANGELO TICOZZI, of Bedford Street, Bedford Square, in the County of
5 Middlesex, Gentleman, do hereby declare the nature of the said Invention for
“AN IMPROVED PREPARATION OR LOTION FOR DISEASES OF THE EYES,” to be as
follows:—

This improved preparation or lotion is intended more particularly for the
cure of ophthalmia, but is also applicable and useful for the cure of other
10 diseases of the eyes.

Without intending to confine myself to the proportions hereafter named,
I may state that the lotion for ophthalmia is composed of the following
ingredients and proportions:—To one quart of water I add half an ounce of
extract of onions, half an ounce of powdered sugar, half an ounce of sulphate
15 of zinc, and one ounce of white copperas, which contains magnesia, cream of
tartar, and arsenic. When all the ingredients are dissolved in the water the
liquor must be filtered, and then it will be fit for use.
